

KALDEWEI

NEW SOLUTIONS

2017

A vertical, textured grey shape, possibly a brushstroke or a piece of paper, is positioned on the left side of the image. It has a rough, irregular top edge and a slightly darker, more textured area near the top left corner. The rest of the image is a solid black background.

**THE MOST
BEAUTIFUL
SYMBIOSIS OF
SENSUALITY
AND INTELLECT.**

KALDEWEI has always stood for timelessly beautiful bathroom objects. Made from superior KALDEWEI steel enamel and shaped into iconic washbasins, shower surfaces and bathtubs, they deliver a unique promise of perpetuity and elegance.

Our demanding standards extend far beyond aesthetic qualities, however. Rather than thinking in terms of products alone, our approach considers comprehensive, intelligent and forward-looking system solutions with great functional added value.

Like the Nexsys – a study for the world's first shower surface without interior contours – for a flawless surface and the easiest installation imaginable. Our installation system frames, which have just been improved with a complete makeover, also guarantee fast, easy installation. We have aligned our compatible sealing system with this new standard. Single-wall washbowls – a delicate enhancement of KALDEWEI's highly desirable washbasins – are a new highlight in the bathroom. Meanwhile, Werner Aisslinger's concept studies are bringing colour into the bathroom. He sees the bathroom of the future as poetic and imaginative – as an exciting collage world of colours and narrative elements – and his studies for KALDEWEI as a part of that.

Find out for yourself how sensuality and intellect enter into a unique symbiosis – and what exactly we mean by **Iconic Bathroom Solutions.**

Yours,

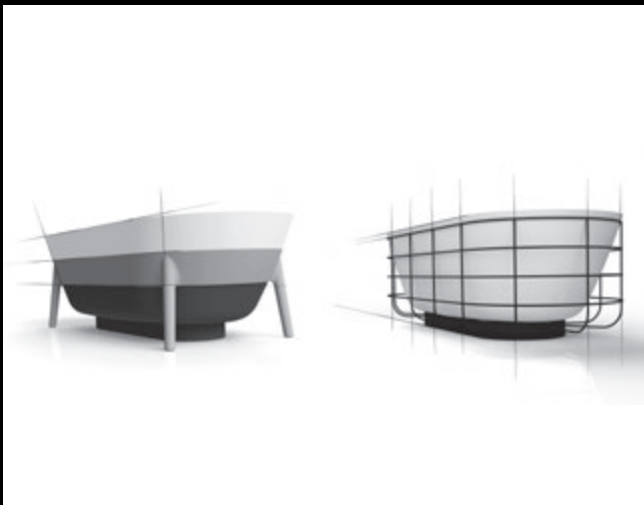

A handwritten signature in black ink, reading 'Franz Kaldewei'.

NEW SHOWER SOLUTIONS

FLOOR-LEVEL. AND
ABSOLUTELY ABOVE REPROACH.

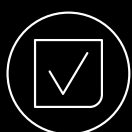

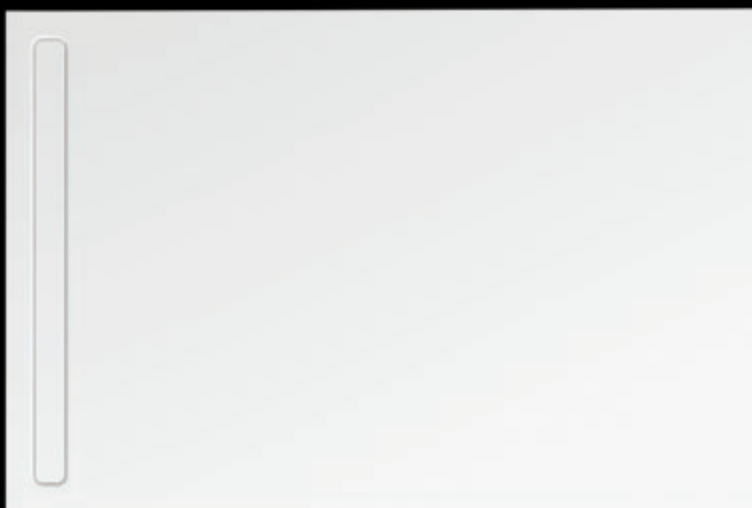

NEXSYS SHOWER SOLUTION

CONCEPT STUDY

PROGRESS IN ITS MOST VISIONARY FORM.

To describe our new floor-level shower surface as a small revolution would be an understatement. Because NEXSYS is a concept study that reveals nothing less than the future of the shower surface. Visionary in its concept, optimal in its functionality and minimalist in

design. There is no quicker and easier way to fit a floor-level shower surface because NEXSYS is not simply a shower surface but rather a complete, installation-ready system.

EASY

FLAT

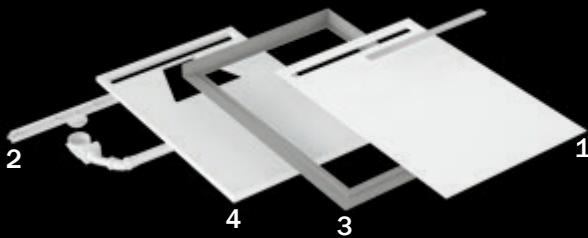

FLEXIBLE

THE SYSTEM SOLUTION

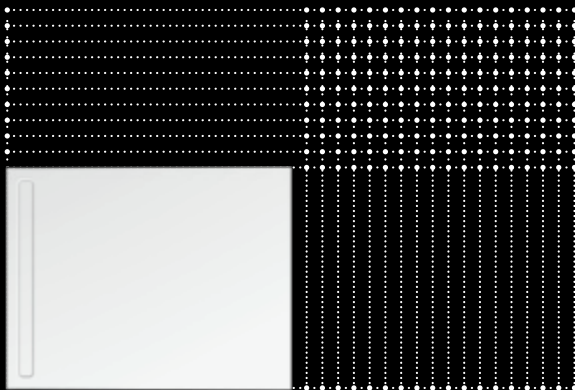

The fully pre-assembled system is at the heart of the concept study. The components are already connected as part of the 4-in-1 system and can be installed imme-

diately. Depending on the design and installation conditions, the NEXSYS can be combined with different design panels and waste fittings.

NEXSYS – THE ASSEMBLY

The system consists of a flat shower surface made of KALDEWEI steel enamel, waste channel, sealing for all of the important installation options, and a support element. The support element with integrated slope ensures optimal and safe water run-off without the need to make an elaborate sloping screed.

A NEW DIMENSION OF FLEXIBILITY

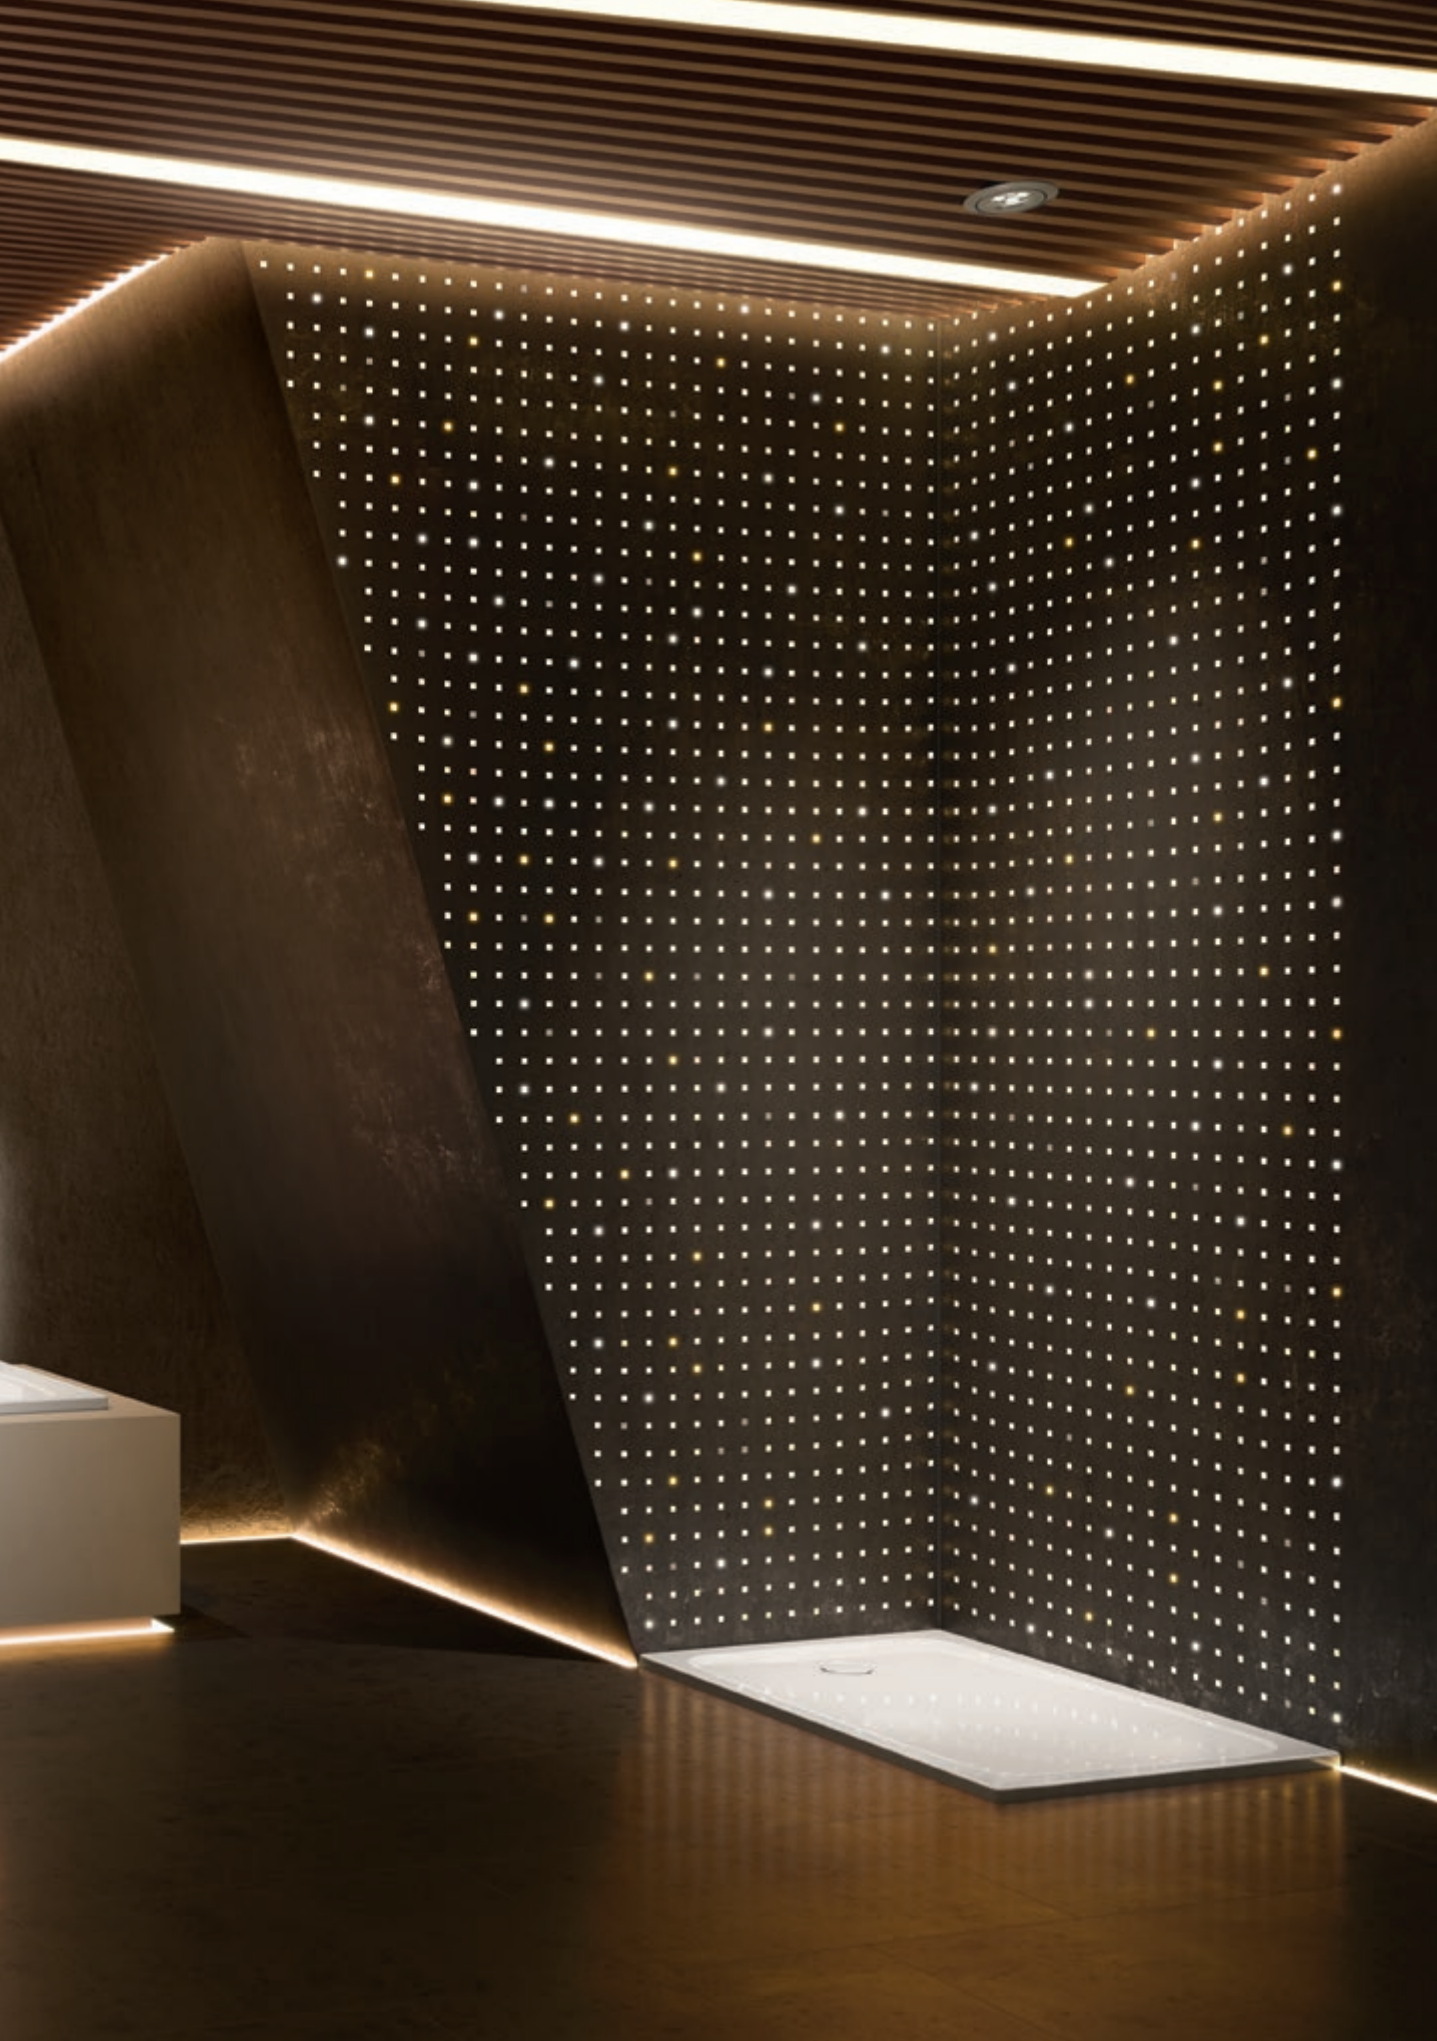

NEXSYS enables complete flexibility for bathroom planning. It has been produced in such a way – with up to 200 dimensions – that a hitherto unachieved diversity of sizes is possible. NEXSYS can thus be used in any bathroom, be it a new-build or a refurbishment.

DETAIL SOLUTIONS

NEXSYS's most striking feature is its design cover which allows it to fit perfectly and absolutely flush into the minimalist overall picture. Another hallmark of the concept's look are the sharp radii that demonstrate KALDEWEI's great manufacturing expertise.

CAYONOPLAN

ADVANTAGE ♦♦♦

RAISE THE STANDARD, REDUCE THE COSTS: CAYONOPLAN SHOWER SURFACES.

The new way of entering the world of floor-level shower surfaces is called CAYONOPLAN. Thanks to 19 different dimensions, its waste outlet at the side and the ultra-flat tray support for the easiest possible assembly, the CAYONOPLAN is the ideal solution. With a rim height of 32mm and/or 40mm for formats with side lengths

of over 120cm, it can be perfectly installed on top of tiles, although floor-level installation is also possible. As the perfect match for the CAYONO bathtub and the PURO washbasin, the CAYONOPLAN rounds off bathroom design.

EASY

ESR FLOOR-LEVEL FRAME INSTALLATION SYSTEM

ANOTHER POINT IN FAVOUR OF OUR SHOWER SURFACES: SIMPLE, FAST INSTALLATION.

The ESR FLOOR-LEVEL FRAME INSTALLATION SYSTEM continues KALDEWEI's tradition of creating ground-breaking system solutions, but as an improvement on its predecessors it allows for even simpler, faster installation. For instance, its superior 3D leg system can now be fine-tuned from above. The ESR floor-level also

offers maximum security when it comes to sealing: the new sealing system was developed to meet new standard requirements, whereby the tried-and-trusted advantage of reversibility has been retained. Put simply, KALDEWEI's excellent product design continues in the places that only the plumber sees.

EVEN EASIER ASSEMBLY

A fully pre-assembled aluminium frame with superior properties: 3D leg system that is adjustable from above; optimum extension kit for heights from 164 to 250mm; high noise insulation thanks to pre-fitted insulated strip, rubber profiles and sound-insulated feet.

NEW SEALING CONCEPT

Security against water penetration damage is the top priority for KALDEWEI's new installation system frame, which is why, both technically and in the context of changing standards, the new sealing concept is the industry benchmark.

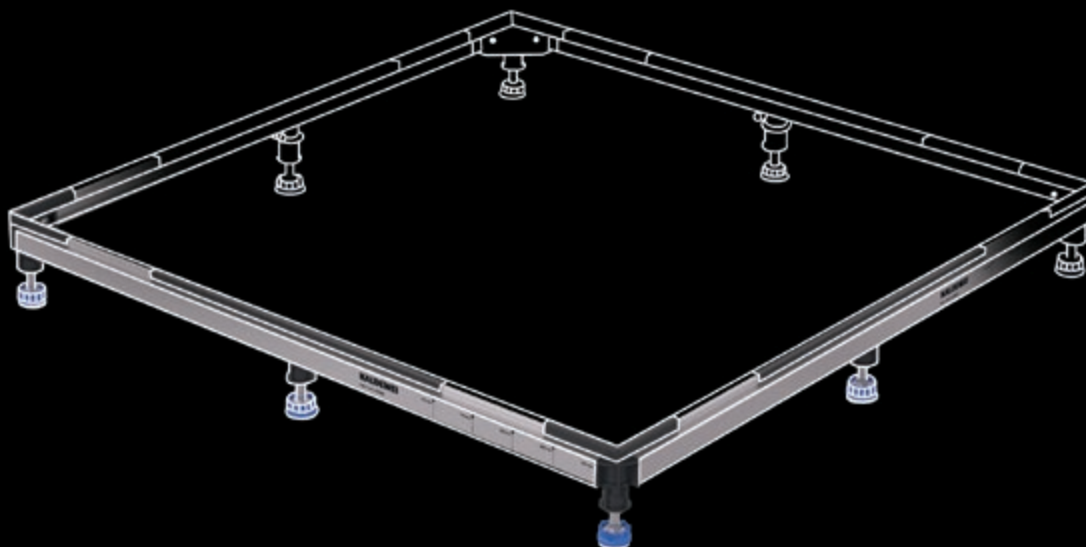

FR 5300 FLEX/FLEX PLUS LEG FRAME

FOR PERFECT SHOWERING PLEASURE: THE PERFECTED SHOWER SURFACE INSTALLATION.

Our leg frames have always allowed for clean, precise work. Nonetheless we have continued to optimise them, focusing on simplified installation so that now, for instance, the height can be adjusted from above. Size markings on the frame do away with the time-

consuming measurement of shower and aluminium profiles. Two models of these optimised leg frames are available: the FR 5300 FLEX and the FR 5300 FLEX PLUS with additional kit.

IMPROVED IN THE DETAIL

The size markings on the aluminium profile make it easier to cut the leg frame to the desired size.

**FLEX COMES FROM FLEXIBLE**

The leg frame can be used for various installation situations: floor-level, on top of floor tiles or for installation on a pedestal. The 3D leg system can be adjusted both horizontally and vertically, allowing for flexible height adjustment from 63 to 164mm. And a separate foot kit can be added on with ease for special heights of 164mm to 250mm.

IT'S ALL INCLUDED

Rubber profiles and sound-insulated feet help to insulate against noise. As a bonus, the FR 5300 FLEX PLUS includes a tray-connection insulation strip, additional floor fastening and a 3D foot unit.

MEET NORMS, EXCEED EXPECTATIONS: WITH OUR SEALING SOLUTIONS.

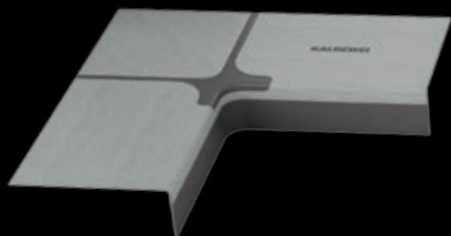

Securing the bathroom against water penetration is becoming ever more important. Since KALDEWEI steel enamel surfaces are seamless, they provide optimum protection. The newly-developed KALDEWEI sealing kits

now enable easy and secure integration into the bathroom's composite sealing. The result is two innovative sealing kits that can be integrated securely and flexibly into numerous installation situations.

IMPERMEABILITY – CERTIFIED

The new KALDEWEI sealing kits have undergone the most stringent testing. Test institutes such as the independent SFV confirm that KALDEWEI sealing solutions are absolutely impermeable – which means they are well prepared for new standards related to sealing.

INNOVATION IN THE DETAIL

The versatility of the new multipurpose corners can scarcely be matched given that they adapt flexibly to any given installation situation. Together with the wall corners, these elements are perfectly coordinated with KALDEWEI shower surfaces and their geometry. The result: easy and secure installation.

SYSTEMATIC SEALING

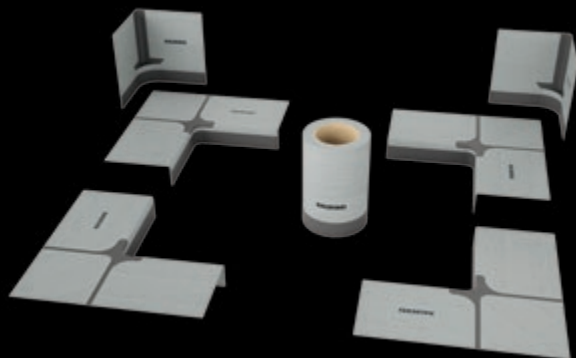

The SEALING KIT FLEX is the universal solution for bathtubs and showers that are not being installed at floor level. The SEALING KIT FLOOR-LEVEL is the complete

solution for the all-round safe sealing of floor-level shower surfaces.

SEALING KIT FLEX

This kit consists of all components needed to seal bathtubs and elevated shower surfaces installed in corners and niches.

SEALING KIT FLOOR-LEVEL

The complete sealing system for floor-level KALDEWEI shower systems consists of an insulation strip, corner profiles for wall corners and multipurpose wall/floor corners.

NEW DESIGN SOLUTIONS

CONCEPT STUDIES FROM WERNER AISSLINGER AND
TINA BUNYAPRASIT.

“BATHROOMS ARE GOING TO BE MORE IMAGINATIVE.”

WERNER AISSLINGER is a multi award-winning designer. His “July Chair” is on show at the MoMA, while his Studio Aisslinger has offices in both Berlin and Singapore. Moreover, his design office’s works are currently the subject of an entire museum exhibition: Werner Aisslinger and his team are showing their creations – including a KALDEWEI bathtub – at the Pinakothek der Moderne in Munich under the title “House of Wonders”.

MR. AISSLINGER, TOGETHER WITH TINA BUNYAPRASIT, YOU HAVE JUST DESIGNED YOUR FIRST BATHROOM COLLECTION FOR KALDEWEI. DO YOU ENJOY WORKING IN UNFAMILIAR TERRITORY?

W. Aisslinger: Our design office is at home in many different worlds. We are accustomed to constantly feeling our way creatively into new contexts and because we handle a great many major interior design projects such as hotels, malls or cruise ships, designing bathrooms is a familiar area for us.

WHAT IS SPECIAL ABOUT DESIGNING BATHROOM OBJECTS?

W. Aisslinger: Bathrooms are currently undergoing a rapid evolution and, apart from the fact that for some time they have been getting bigger, more homely and more wellness-oriented, in future they will also be the only places in the home where daily rituals are more important than the increasingly omnipresent digital world which is gaining a foothold in every area of life. For designers this means creating a place of wellbeing that will become increasingly more colourful, material-oriented, more unconventional and more imaginative.

WHAT WAS THE GREATEST CHALLENGE IN DESIGNING THE OBJECTS?

W. Aisslinger: Taking another step forward with KALDEWEI and being the first manufacturer to test rimless design with regard to steel enamel. Then there was the question of how the pure, single-shell bathtubs could be interpreted within the given space in a completely new way and integrated into different architectures. The result was TRICOLORE and GRID, whose concepts offer a new connection with the surrounding architecture and allow bathtub and washbasin, like freestanding pieces of furniture, to assume sculptural yet functional structures.

POETIC AND IMAGINATIVE.
LIKE THE BATHROOM OF THE FUTURE.

DESIGN

Werner Aisslinger & Tina Bunyaprasit. The hallmark of the GRID concept is the way surfaces and volumes are dissolved in favour of an open framework structure. The single-walled and thus weightless-looking washbasin

and bathtub seem to float and are visible as outlines. The grid structure contains not only the washbasin and bathtub but can also integrate products and accessories or plants that can be inserted into it, collage-style.

DESIGN

Werner Aisslinger & Tina Bunyaprasit. TRICOLORE explores no fewer than two new themes. On the one hand, the mainly monochrome white bathroom world is completely revolutionised through the addition of colour. On the other hand, the bathtub puts an entirely new

interpretation on the historical archetype of the free-standing lion claw tub. Think collage! The bathtub is enamelled in two colours; the third colour comes from the frame whose wraparound band appears to have been cut out of a different bathtub.

NEW WASHBASIN SOLUTIONS

DISCOVER THE
EXTRAORDINARY
IN THE EVERYDAY.

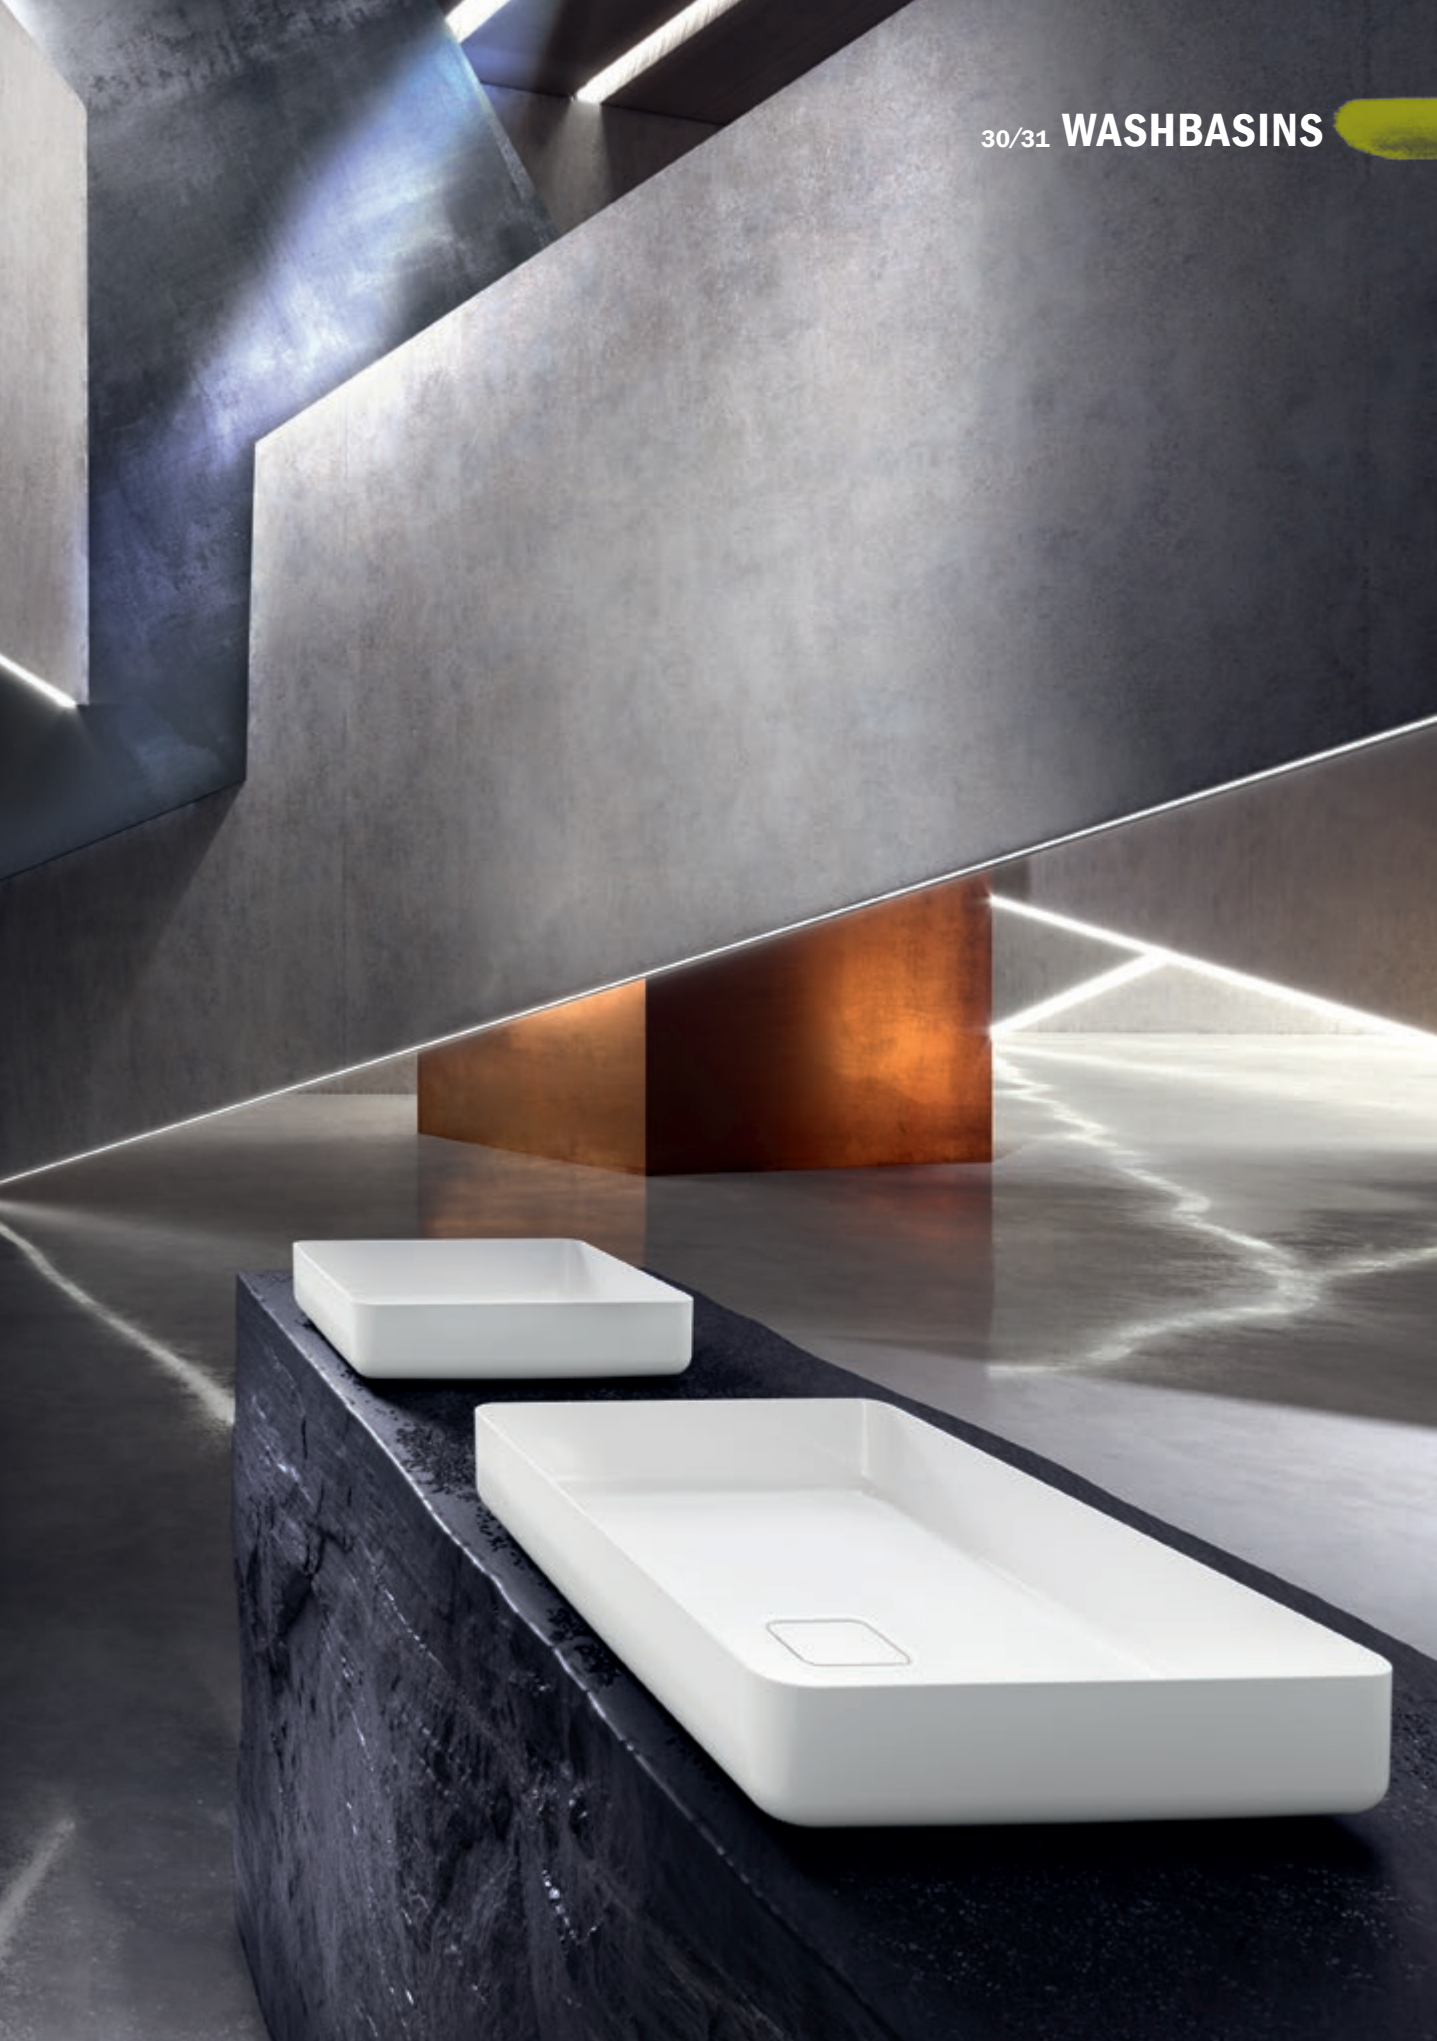

CONSUMMATE TECHNOLOGY TOO: DELICATE SHAPES MADE OF TIMELESS STEEL ENAMEL.

For decades we have driven our artistry in working with steel enamel to ever new heights. Because this is the only way in which outstanding bathroom solutions can be achieved: by completely rethinking, by working in entirely different ways, by taking different paths. In order to produce the uniquely delicate appearance of the MIENA washbasin bowls we overcame technical

constraints and made single-wall KALDEWEI steel enamel for the first time. This allows us to open up a new product world, for ourselves and for you, consisting of delicate, almost fragile objects in an indestructible material whose minimalist design enriches virtually every KALDEWEI product line.

MIENA

AVANTGARDE ♦♦♦

MIENA – ROUND

The round bowls of the MIENA line appear delicate, almost fragile. The contours run in a single gentle and harmonious curve towards the waste outlet. The

resulting reduced footprint gives the bowls an even more weightless look. You almost get the sense that they are floating on the given undercounter.

MIENA – ANGULAR

The angular MIENA bowls are just as delicate but with a far more masculine look. Comparatively small radii, the only partially rounded contours and the square waste

cover accentuate this effect – and extend the spectrum of the bowl family in the most elegant way.

THE PURO WASHBASIN FAMILY. JUST BEING BEAUTIFUL ISN'T ENOUGH FOR US.

Clean-lined, minimalist, high-end yet affordable design – can one expect more of bathroom furnishings? Naturally, says designer Anke Salomon, who has added models to her PURO washbasins that also offer solutions for small

guest bathrooms, for instance, or for typically large and much-used main bathrooms because they have been specifically designed for families with different needs.

**GENEROUS SOLUTION**

The perfect design of a wash area in large bathrooms: modern, spacious, minimalist. Different tap-fitting

holes allow the user to choose between use by one or two people.

**FAMILY SOLUTION**

Modern, generously-sized double washbasin with space for accessories. Also ideal for public areas, restaurants,

office buildings and perfect for family bathrooms.

DESIGN SOLUTION

Anke Salomon has pared down these model versions to their absolutely essential practical and functional details to produce a minimalist, generous shape – not

for small or highly frequented bathrooms but, specifically, for beautiful bathrooms.

GUEST SOLUTION

Enormously versatile and compact hand washbasin for guests or small urban bathrooms. Wall-mounted and

countertop, as well as right and left versions available.

SILENIO
AMBIENTE ♦♦♦

BUILT-IN SOLUTION

The sensuously modern design of the SILENIO line is even more thrilling in the shape of the built-in washbasin. It is a real delight to see the gentle organic interior flowing out into the narrow, precise washbasin rim which is a mere 14mm high. The fluid, delicate design allows

the washbasin to visually merge with the chosen console or piece of furniture. And no matter which size you choose, a SILENIO built-in washbasin offers you lavish space for taps and accessories.

COMPACT SOLUTION

The formal clarity and tranquillity of the CONO washbasins are a fusion of aesthetics and user-friendliness. This applies to an even greater extent to the new square model which, thanks to its compact dimensions, fits

perfectly where other versions appear out of proportion. What makes this CONO washbasin an especially practical solution is that it can be installed in every conceivable way and is available with 1, 3 or no tap holes.

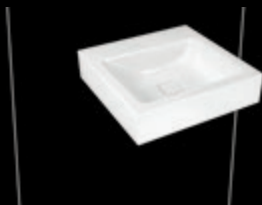

GUEST BATHROOM SOLUTION

Two years ago, matching washbasins were added to the CONO product family. The quality, and the consistent design and material make the bathroom into something truly special. Now the CONO line goes further, this time in the guest bathroom – in a space where an ultra

compact hand washbasin indicates that while the space may be limited, the guest is greatly appreciated. The CONO hand washbasin is available in two versions with the tap panel to the left or right, and an option of 1 or no tap hole.

NEW BATHTUB SOLUTIONS

VISUALLY ATTRACTIVE.
FUNCTIONALLY PERSUASIVE.

CLASSIC DUO OVAL

MEISTERSTÜCK 

IN A CLASS OF ITS OWN: THE CLASSIC IS NOW A MEISTERSTÜCK.

Those who call their bathtub a “classic” can be fairly certain that they have found the optimum shape for timeless beauty. In fact, time has even matured our CLASSIC DUO OVAL so that its shape can now express its full potential. Seamlessly encased in KALDEWEI

steel enamel with an oval contour and conical external lines, it is the archetype of the freestanding bathtub. An absolute classic! And because it also wants to be a relaxed place for two people to bathe at the same time, this freestanding classic is available in two sizes.

MODEL	MODEL NO.	VERSION	LENGTH (cm)	WIDTH (cm)	DEPTH (cm)	CUBIC CAPACITY (litre*)
MEISTERSTÜCK CLASSIC DUO OVAL	1113	Freestanding	170	75	43	124
	1111		180	80	43	158

*Water capacity less average 70 litre displacement

THE NEW WAY TO COMBINE SHOWERING AND BATHING

PURO SET WIDE combines bathing and showering in one tub in a completely new way. The centrally-positioned waste and overflow is not only an attractive design feature but allows for ample freedom of movement while showering. The reduced tub depth makes it easy to

get in and out and reduces water consumption while bathing. The rim of the tub is flat and wide all the way round so taps and accessories can be placed anywhere – entirely in keeping with your personal preferences and the available space.

MODEL	MODEL NO.	LENGTH (cm)	WIDTH (cm)	DEPTH (cm)
PURO SET WIDE right	667	170	75	39
PURO SET WIDE left	668	170	75	39

COMFORT

EXCLUSIVE FOR KALDEWEI BATHTUBS: BEAUTIFULLY-MADE DETAIL SOLUTIONS

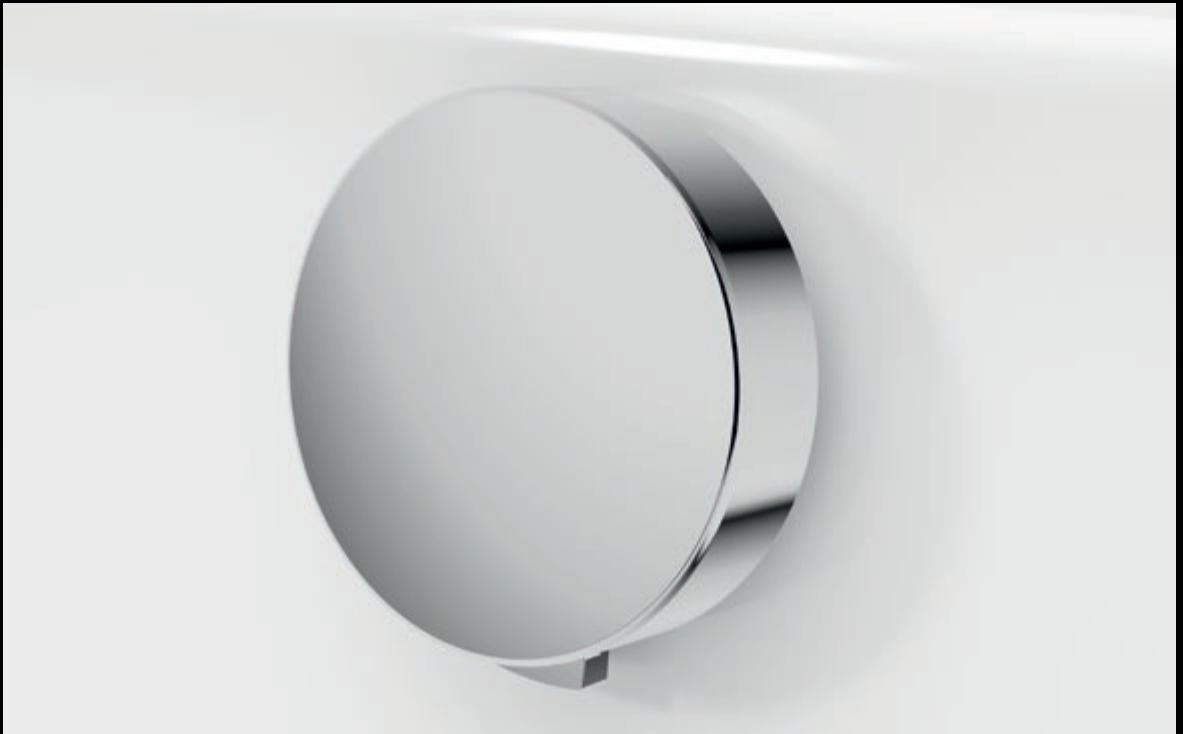

The COMFORT LEVEL waste and overflow fitting blends virtually seamlessly into the bathtub design. The overflow knob is now far flatter and more discreet. Small radii give the visible chrome parts a modern look. The unobtrusively designed overflow lever allows the

maximum water volume to be infinitely increased by up to 50mm. This special feature for more bathing comfort is only available from KALDEWEI. And if you choose COMFORT LEVEL PLUS, your waste and overflow fitting even comes with an integrated water-fill function.

VARIABLE OVERFLOW

To provide the highest degree of pleasure and relaxation, with the COMFORT LEVEL and COMFORT LEVEL PLUS, the bather's immersion depth can be infinitely increased by up to 50mm – by simply turning the discreet lever.

FILL FUNCTION

In its new, astonishingly flat design too, only COMFORT LEVEL PLUS offers the combination of variable overflow, waste and fill. The fill function is invisibly integrated into the overflow, and the bathtub is filled very quietly.

A vertical, textured grey shape, resembling a piece of paper or a brushstroke, is positioned on the left side of the image. It has a rough, torn edge on its left side and a smoother edge on its right side. The shape is set against a solid black background.

**BEAUTY THAT
NEEDS NOTHING
MORE. EXCEPT,
PERHAPS, SOME
COLOUR.**

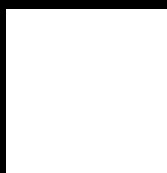

PERFECT HARMONY IN THE MOST BEAUTIFUL SHADES.

As of now our washbasins are also available in beautifully radiant colours. Add a discreet highlight with standard bathroom colours. Or choose one of the exquisite matt shades from the COORDINATED COLOURS COLLECTION which is matched with the latest tiling trends. Create a

homely feel by stylishly harmonising the colours of your bathtub, shower surface and washbasin. Bathe your entire bathroom in a warm colour. Or create striking contrasts. The COORDINATED COLOURS COLLECTION contains all you need.
